Acute Care Alberta

Insulin Pump Therapy Program Video Series – Knowledge Check

Goal

This knowledge check is intended to help you review key information from the videos, reflect on how it applies to you, and identify where you may need more support from your diabetes team. Please fill out this knowledge check and review it with your diabetes educator when you come in for an appointment.

Name:

Date of birth:

Name of guardian completing the learning check (if patient is less than 18 years old):

Alberta Health Care Number:

Date:

---

1. **The insulin pump only delivers rapid-acting insulin.**
   - ❑ True
   - ❑ False

2. **Does the insulin pump require daily input from the user, or is it a "set it and forget it" system?**
   - ❑ Daily input
   - ❑ Set it and forget it

3. **Choose all the correct answers. Basal insulin delivered from the insulin pump:**
   - ❑ Is delivered with meals
   - ❑ Is background insulin
   - ❑ Is delivered 24 hours a day
   - ❑ If stopped and not replaced, can result in diabetic ketoacidosis (DKA) in as few as 2 hours

4. Explain what someone using an insulin pump must do to prevent DKA:

5. What items do you need in your safety kit to prevent DKA:

6. Please write down any questions you have for your educator to talk about at your next appointment.
