

Release: New Report Types

November 3, 2025

Additional reports will be made available to patients in MyHealth Records via My Personal Records starting November 3, 2025. Reports visible in the Operative, Procedure and Investigation folder in Netcare will be made available to patients.

Opt-In

To view in My Personal Records, users will need to opt in to receive Procedures reports. If they opt-in and click on a report to view it, a pop-up window will appear prompting them to confirm that they want to view the report.

Report History

On November 3, 2025, users who have reports dated within the last year will be able to view these. Between January and March 2026, all available past reports will gradually be made available.

Examples of report types

- Operative notes
- Endoscopic procedures
- Labour and delivery notes
- Pulmonary function tests
- Arterial blood gases
